**Victron Energy**

# About Victron Energy

# More freedom

Energy. Anytime. Anywhere.  
That's what Victron Energy is all about.

Your spin-off: more freedom.

Also cost saving and simplifying  
systems comes with the same  
package.

Allow us to introduce ourselves to you.

# History

Some 40 years ago people required on-board power for their household appliances. Especially in the inland waterways in The Netherlands and Germany.

Victron Energy began producing self-designed inverters.

Many of these inverters still work on a daily bases !

# Present

## Facts and figures:

- Private owned
- 59 employees
  - 4 Service
  - 19 Sales
  - 23 R&D
  - 13 Finance, quality control and logistics, etc.
- Production in far East (India and Malaysia)
- Sales worldwide by a distributors network
- Active in markets: Marine, Industrial, Automotive, Off Grid and Mobility
- Turnover 2012 ~ 55 mln euro
- Average growth over the last 5 years: 20-30% per year.

# Research and development

All produced products are a result of our own research and development. Being innovative is the key to success !

All our units have years of designing experience, making them more reliable and powerful !

Features like PowerAssist and the ability to parallel units was introduced by Victron Energy.

# Productions

The complete production is mainly done in the Far East.

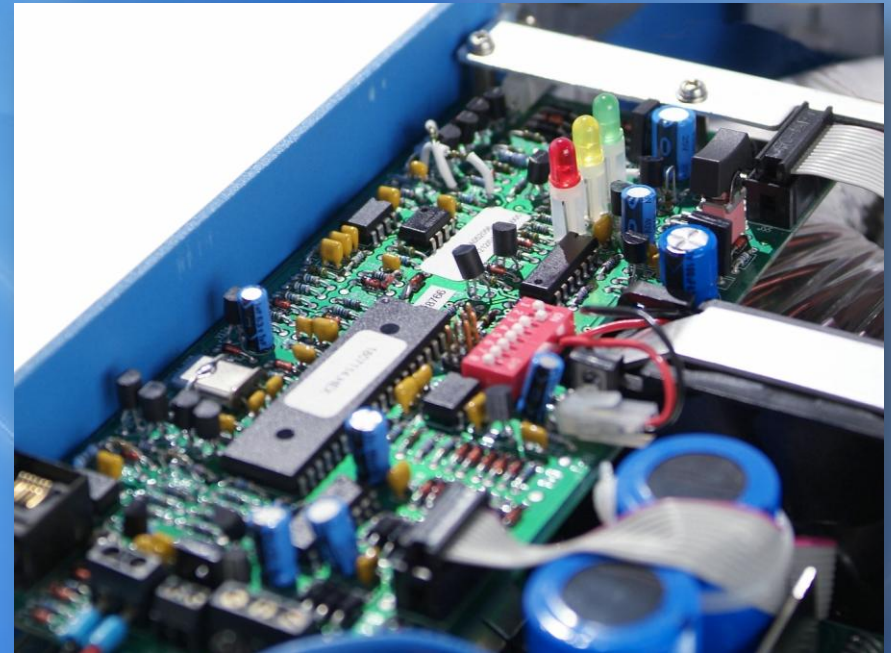

Main reason for this is the lower costprice of components.

Stock is held in third party warehouses worldwide and distributed on demand.

# Service

The service department at Victron Energy coordinates service worldwide and is focused on the fastest and best solution in every situation.

In the event that units are sent to our service department they will be sent back within a few days.

# Sales

Our world wide sales is done by an extensive network of distributors and area managers employed by Victron Energy.

All sales managers have a technical background so they can not only advise on financial side but are also experts on calculating and designing the electrical side.

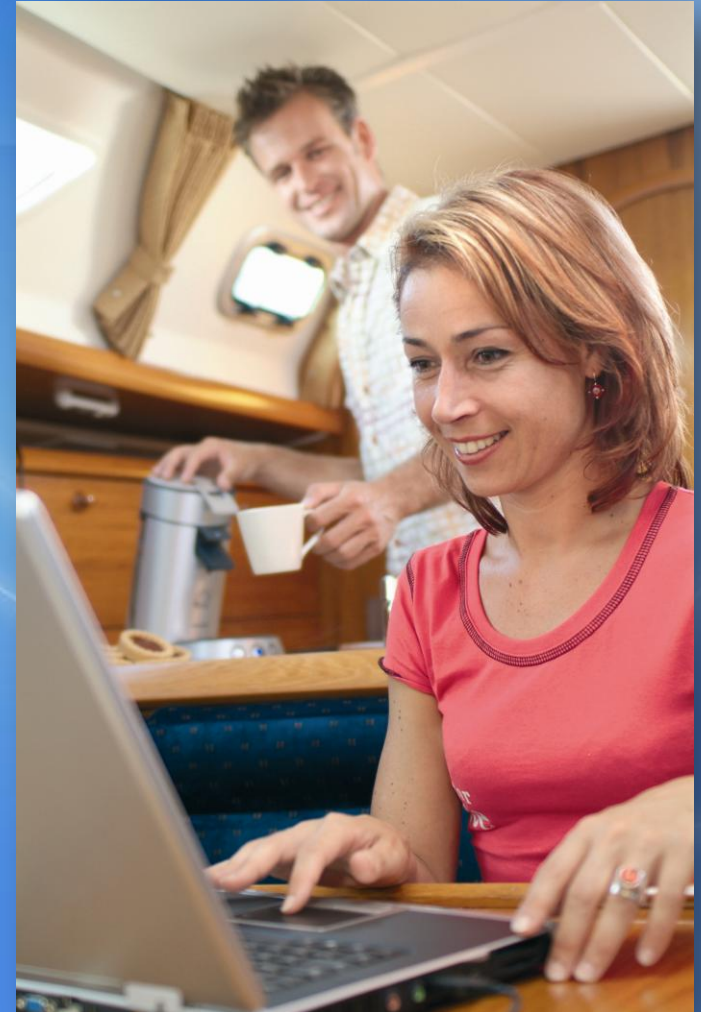

# Future

Beside investing in our existing markets such as Marine, Automotive and Industrial we will also have a focus on growth in the Off-grid market.

The philosophy will remain that we have to be known for our unrivaled reputation for technical innovation, reliability, and build quality.

Our products are widely considered to be the professional choice for independent electric power.

We make sure that you will have more freedom.
